

SCREEN, STORM CAM FASTENER

- PART # HCF.5-A-606 CUP AND PAWL, UNLACQUERED BRASS
- PART # HCF.5-B-606 PLATE AND SCREWS, UNLACQUERED BRASS
- PART # HCF.5-A-613 CUP AND PAWL, US10B OXIDIZED BRONZE
- PART # HCF.5-B-613 PLATE AND SCREWS, US10B OXIDIZED BRONZE
- PART # HCF.5-A-619 CUP AND PAWL, STAINLESS STEEL
- PART # HCF.5-B-619 PLATE AND SCREWS, STAINLESS STEEL
- PART # HIT INSTALLATION TOOL

Cam fasteners are not all alike! This cam lock is designed for removable wood screen/storm panels. It is engineered for easy installation machining. All that is required is a biscuit machine, a 1/2" forstner bit, and a 1/2" router bit. The cam uses a slotted head to indicate blade position. The cup that holds the cap screw head has a threaded exterior to insure that it will not fall out when the door is slammed. New improvement, an O-ring to keep out moisture and add friction.
